**Proofread an Article** Circle five misspelled words in the article. Write the words correctly. Find a sentence fragment. Write it correctly.

## Using the Library

If your library uses a computer database, that's where to start. There are numerous ways to find a book.

Be innovative. Most systems will allow you to search by author, title, or subject.

Make a list of as many call numbers on your topic as you can to be most productive. Then find the section in the library that holds the call number of your item. When you find an item on the shelf. Check its appendixes and its index for other sources. If a book you need is already taken out, you can reserve it.
