

Greek Word Parts

Proofread an Article Circle six misspelled words in the article below. Write the words correctly. Find a sentence with an incorrect verb form. Write it correctly.

Archaeology

Archiology is a fascinating area of science. By digging down through layers of earth, researchers can find remnants of arkaic civilizations ranging from bits of broken pottery to the tomb of a once mighty aristacrat to entire buried cities. These finds helping scientists establish the chronology of human development. Artifacts hidden beneath the surface provide a physical chronecle of the development of humankind. That's why scientists catalog and arkive the artifacts in museums throughout the world.
